NET WT. 15 OZ. (425g)

ALSO KILLS AND REPELS

ROACHES
ANTS
FLEAS
TICKS
CHIGGERS

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Hold container upright, with nozzle pointed away from you and press actuator button, spraying as directed.

TO TREAT ANIMALS:

To protect animals from attacks of stable flies, horse flies, deer flies, house flies, horn flies, mosquitoes, and gnats, spray about 3 seconds on each side being careful to spray legs, belly, neck, back, and sides. Cover eyes when spraying face, or spray on sponge or cloth and apply to face as a wipe. Repeat treatment as necessary when flies are troublesome. Brushing animal after applying will bring out a bright sheen.

TO KILL AND REPEL FLYING INSECTS:

Spray in areas where insects congregate. Direct spray to contact insects for rapid knockdown and kill. Spray around outside of door facings and screens to render area unattractive to insects. This helps to repel insects and prevent entrance into building.

TO CONTROL COCKROACHES AND ANTS:

Spray into cracks and crevices. Spray directly on cockroaches for fast kill. Apply behind refrigerator, stove and cabinets where insects tend to hide.

TO CONTROL TICKS, FLEAS AND CHIGGERS:

Spray on animal until fur is moistened lightly. To ensure thorough coverage, part the fur by stroking against the lay of the hair while spraying. Ticks are tough; spray directly on them. Repeat every few days until animal is free of insect, nits or eggs that reattach.
