

Pyranha[®]

Your Trusted Leader in Insect Control

Introducing **ZERO-BITE**

New! Zero-Bite Natural Insect Spray is fly control for horses and dogs the way Mother Nature intended. The goodness of geraniol, coconut and wintergreen combine to bring you mother nature's most powerful natural fly fighter. The natural oils in this spray are suspended in more than 90% water so it is neither oily nor greasy. Discover this natural alternative that contains zero chemical pesticides and has a botanical scent.

**Now for
Horses
AND
Dogs!**

Wipe N' Spray

Pyranha Wipe N' Spray is a pyrethrum-based formula that is applied directly on the animal. This ready-to-use product provides fly protection and imparts a high sheen to the hair when brushed out. A favorite of show horse owners, effective protection results from only 1 to 2 ounces per head. Wipe N' Spray is citronella scented and contains lanolin as a coat conditioner. It has been proven effective on biting flies, mosquitoes, gnats, fleas and ticks.

Available in quart or gallon size

Pyranha Aerosol

Pyranha Insecticide Aerosol is an equine aerosol that has been on the market for over 15 years. Our citronella scented, aerosol formula is the #1 choice among showmen and trainers across the country. Simply apply and brush out just before entering the show pen for unbeatable fly-fighting power and lustrous eye-catching sheen.

Pyranha Equine Spray and Wipe

Our water-based formula is quickly becoming a stable favorite among horse owners. It won't attract dust and grime like oil-based products and offers long-lasting protection against a wide array of insects thanks to the power of three active ingredients. Under optimal conditions (no sweat, no rain) the formula can be effective for up to 30 days. Avid riders will want to reapply every 10 - 14 days to maintain maximum insect control.

Available in quart or gallon size

Pyrethrin Shampoo

Pyranha Pyrethrin Shampoo is an insecticidal shampoo rich in coconut conditioners that aid in building body, luster and groomability to the coat of your animal. It controls stable flies, horse flies, deer flies, face flies, gnats and mosquitoes on horses. For dogs it is highly effective against fleas, ticks and lice when used as directed. The Pyrethrin Shampoo is great for tails and manes - get manageable, beautiful manes and tails and fly-fighting benefits all in one product!

***Paving the way in innovative,
natural and effective insect control
for nearly four decades!***

What Can Pyranha Do to Protect My Barn?

Pyranha, Inc. was the ORIGINAL creator of the automatic insect control system that you see in so many barns today and you can rest assured that Pyranha can make your barn an insect free zone for both your horses and you!

SprayMaster Barn Misting System

The SprayMaster Barn Misting System consists of a ½ horse-power electric motor-driven pump controlled by an electronic timer that is programmed to dispense insecticide in the form of a very fine mist at specific intervals through special spray nozzles. The result is a state-of-the-art, hassle-free solution for the control of harmful flying and biting insects in and around horse barns.

1-10 HP and 1-10 HPS

1-10 HP and 1-10 HPS Concentrated System Refills are insecticide refills for the SprayMaster Barn Misting System. Developed over 30 years ago using the highest quality pyrethroids, HP is a premium formulation that has set the bar for effective automatic flying insect control in horse barns. It provides both quick knockdown and long lasting protection against a broad range of harmful biting insects that include: horn flies, deer flies, stable flies, face flies, midges, mosquitoes and more.

Can Pyranha Help Rid My Barn of Odors?

You bet! ODAWAY is a concentrated, liquid odor absorber that eliminates a broad spectrum of household and barn-borne odors. Odaway is especially effective when dispensed by way of automatic misting system because it encapsulates and neutralizes odors instead of just masking them, leaving the premises with a fresh, clean smell.

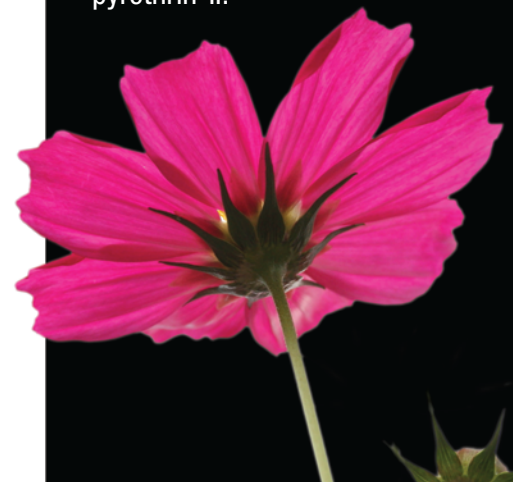

About PYRANHA

Pyranha Incorporated was chartered December 4, 1972, for the purpose of manufacturing and marketing a full line of ready-to-use fly control products. Pyranha, Inc. also developed an automatic insect control system, which dispenses specially formulated insecticides providing the horse industry with a reliable, effective and economical method of insect control.

What are PYRETHRINS?

Pyrethrins are natural insecticides produced by certain species of the chrysanthemum plant. The flowers of the plant are harvested shortly after blooming and are either dried and powdered, or the oils within the flowers are extracted with solvents.

The resulting pyrethrin containing dusts and extracts usually has an active ingredient content of about 30%. These active insecticide components are collectively known as pyrethrins. Two pyrethrins are most prominent, pyrethrin-I and pyrethrin-II.
